

LED Combination Rear Lamp

Item price - £35.50 + vat

Rear lighting

- 24v Tail light / Stop light / Indicator in LED
- 2SD 344 200-311 (incl. Resistor)

Product features

Power-top LED

Optimal light output due to the combination of high performance LEDs and precision optics.

Long life and low energy consumption

To extend lamp life the component arrangement is thermally optimised. At high temperatures, this prevents overheating of the LEDs. This passive thermal management leads to a maximisation of service life – even in adverse operating conditions.

High water resistance

Tested to IP 69: Guaranteed absolute water-tightness.

High vibration resistance

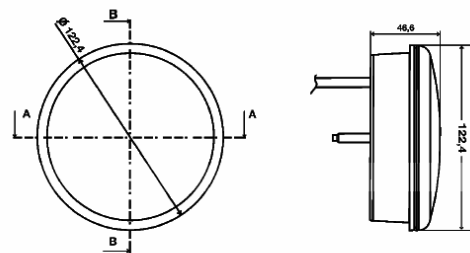

Tested in accordance with Hella standard 67001 class 10, enables use in the field of heavy construction machinery.

Overvoltage protection

The overvoltage protection makes sure that the light is not Damaged. (Even by voltage peaks of up to 100 V.)

Reverse polarity protection

The lamp does not suffer damage if the poles are connected incorrectly.

“Fit and Forget”
